*This list provides a selection of continuing education opportunities that are known to Water Rights and the CE committee. It does not provide a list of every opportunity available to a driller. It is acceptable to obtain CE from sources not on this list as long as it pertains to well drilling and is approved by the CE committee either before or after the class is taken. This list will be updated regularly on our web site at <http://nrwr1.nr.state.ut.us/wellinfo> and a revised list sent to licensed drillers quarterly.

**A class on Utah Well Drilling Rules is required at least once every three years. State-sponsored seminars will always offer this required class, however UGWA seminars may or may not offer this class. Check with association first.

Notes: Six CE credits are required each year to renew a driller's license. Generally, one hour of training is equivalent to one credit. At least two separate class (topics) must be taken each year to obtain the required credits. The required rules class must be taken at least once every three years. CE credit cannot carry over from one licensing year to another. It is the responsibility of the driller to maintain

Drillers must provide copies of this documentation with their 2003 renewal application. For more information or questions, contact Jim Goddard at Water Rights at 801-538-7314.
